

Product Requirements Document (PRD)

DJ Nish — Premium DJ Portfolio & Booking Experience

Version

1.0

Product Name

DJ Nish

Vision

Create a visually striking, modern DJ website that feels like a live performance rather than a traditional portfolio. The experience should combine immersive animations, smooth interactions, and minimal design to establish DJ Nish as a premium, high-energy, professional DJ brand.

The site should feel:

- Futuristic
 - Elegant
 - High-energy
 - Premium
 - Interactive
 - Minimal but memorable
-

Brand Identity

Logo

Use the uploaded DJ Nish logo as the primary brand element.

Color Palette

Based on the logo:

Color	Usage
Neon Pink (#FF008C)	Accent color
Electric Purple (#A020F0)	Main gradients
Cyan Blue (#15B8FF)	Secondary accent
Off Black (#050505)	Background
Soft Gray (#BFBFBF)	Supporting text
White (#FFFFFF)	Primary text

Design Language

Think:

- Apple minimalism
- Spotify motion design
- Boiler Room energy
- Modern music festival visuals

Avoid:

- EDM clichés
 - Flashy neon overload
 - Crowded layouts
 - Generic DJ templates
-

Target Audience

Primary

- Event organizers
- Wedding clients
- Clubs
- Corporate event planners

Secondary

- Fans
 - Promoters
 - Venues
 - Collaborators
-

Core Website Goals

1. Showcase DJ Nish brand
 2. Increase booking inquiries
 3. Display mixes and performances
 4. Build credibility
 5. Create a memorable first impression
-

Site Structure

1. Landing / Hero

Purpose

Immediate wow factor.

Layout

Fullscreen.

Large animated logo centered.

Background:

- Dark
- Reactive particles
- Audio-wave inspired motion

Headline

DJ Nish

Subheadline

Creating unforgettable experiences through music.

CTA Buttons

Primary:

- Book Now

Secondary:

- Watch Live Sets

Animation

Logo loads in pieces:

- N appears
- I rises from record
- S slides in
- H morphs from waveform

Entire sequence takes ~3 seconds.

Hero Interaction

As mouse moves:

Background gradients subtly follow cursor.

Particles respond to movement.

Logo emits a faint glow pulse.

Nothing should feel distracting.

2. Scroll Experience

Entire website should use smooth scrolling.

Use:

- Lenis
- GSAP ScrollTrigger

Every section transitions naturally.

No abrupt changes.

3. About Section

Layout

Split screen.

Left:

- Professional DJ photo

Right:

- Story

Example:

DJ Nish blends technical skill, crowd reading, and seamless mixing to create unforgettable experiences at weddings, corporate events, private celebrations, and live venues.

Animation

Photo reveals through vertical mask.

Text fades upward.

4. Experience Counter Section

Dark section.

Large animated numbers.

Examples:

150+

Events Performed

10,000+

People Entertained

5+

Years Experience

Animation

Numbers count upward as section enters viewport.

5. Signature Sound Section

Most unique section.

Layout

Interactive Vinyl Record

Large center vinyl.

When hovered:

Record spins.

Tracks displayed around circumference.

Example Genres

- House
 - Hip-Hop
 - Open Format
 - Bollywood
 - EDM
 - Top 40
-

Interaction

Clicking genre:

Changes background mood.

Changes waveform animation.

Changes audio preview.

6. Featured Mixes

Minimal card design.

Large embedded music players.

Examples:

- SoundCloud
 - Mixcloud
 - YouTube
-

Card Hover

Subtle glow.

Slight lift.

Gradient border animation.

7. Performance Reel

Full-width cinematic section.

Background video:

Live crowds.

Lighting.

Transitions.

Energy moments.

Interaction

Play button expands from center.

Video opens fullscreen modal.

8. Event Types

Horizontal scroll section.

Cards:

Weddings

Elegant visuals

Corporate

Professional visuals

Private Parties

Energetic visuals

Clubs

High-energy visuals

Animation

Cards stack while scrolling.

Almost like Apple product storytelling.

9. Testimonials

Minimal.

Large quotes.

Animation:

Each quote slides horizontally as user scrolls.

Glassmorphism cards.

10. Gallery

Pinterest-inspired layout.

High quality event photos.

Interaction:

Hover:

- Slight zoom
- Color enhancement

Click:

- Fullscreen lightbox
-

11. Booking Experience

Most important conversion section.

Layout

Floating glass panel.

Fields:

- Name
 - Email
 - Phone
 - Event Type
 - Date
 - Location
 - Message
-

Unique Feature

Availability Checker

User selects date.

Timeline glows:

- Available
 - Limited Availability
 - Unavailable
-

Submit Animation

Button transforms into spinning vinyl.

Success state:

"Let's make it unforgettable."

12. Footer

Minimal.

Logo.

Social icons.

Quick links.

Copyright.

Motion System

Global Animation Philosophy

Everything should feel:

- Fluid
- Musical
- Rhythmic

No animation should exceed 700ms.

Scroll Effects

Parallax Layers

Background:
20% speed

Content:
100% speed

Decorative elements:
60% speed

Section Reveals

Opacity:
0 → 100

Translate:
40px → 0

Duration:
0.8s

Unique Signature Effects

1. Reactive Soundwave

Thin waveform permanently runs across page.

Responds to:

- Mouse movement
 - Scroll velocity
-

2. Vinyl Cursor

Desktop only.

Cursor transforms into mini record.

Subtle spin.

3. Logo Morph

Every few minutes:

DJ Nish logo briefly transforms into:

- Equalizer bars
- Soundwave
- Record

Then returns.

4. Beat Pulse Background

Very subtle pulse synced to a simulated BPM.

Almost imperceptible.

Creates life in the interface.

Technical Requirements
